

JUST GLEANINGS

THOSE NAVY BEARDS

Luxurious beards of Canadian tars often caused wondering comments from the initiated. The Navy man, in fact, requires permission from his superior officer before he can sport a beard. The rule is that he can sport a beard but must either be shaved clean or not at all. Mustaches are taboo.

BAUFF-JASPER ROAD TO BE OPENED JUNE 15

The 14.6-mile mountain highway from Bauff to Jasper will be open to car traffic on June 15. It was announced last week. The official opening will take place July 1, in conjunction with the opening of the Big Bend Highway June 29. Work is progressing rapidly on the mountain road and it is expected it will be in first class shape by June 15th.

CANADIAN FACTORIES 'T'Y

Canadian factories have delivered up to May 20, 400,000 blankets, 125,000 pairs of boots, 270,000 shirts, 175,000 pairs of socks, 150,000 uniform blouses and jackets, and 100,000 uniforms and trousers, according to Hon. C.D. Howe, Minister of Munitions and Supply.

TEXTILE INDUSTRIES HUMMING

Orders by the Department of Munitions and Supply will keep the Canadian textile and finishing industries busy to capacity for months to come. Weekly rate of production for articles is about: blankets, 20,000; boots, 20,000 pairs; battle dress uniforms, 5,000 suits; socks, 40,000 pairs; underwear, 30,000 suits.

CANADA MAKES MANY SHELLS

Eight Canadian plants are at present engaged in the manufacture of 2,250,000 shells, while orders for a like amount are being sent out. Canadian plants will then be engaged in producing 4,500,000 shells.

16,643 ALIENS ARE REGISTERED

A total of 16,643 enemy aliens, male and female, are registered in Canada. With the exception of 4,222, all are required to report as often as their local registrar considers necessary. Practically all report in person once a month.

Mr. and Mrs. C. O'Hanlon and Gerald spent the week end visiting at Craig's with Mr. and Mrs. Bruce Ramsey.

WEED INSPECTOR TO WAGE WAR ON HOARY CRESS AND OTHER WEEDS

No Road Grant This Year for Municipality

The Council of the Municipal District of Carbon met in regular session on Tuesday, June 14th in the Municipal office at Carbon. Minutes of the previous meeting were read and adopted and general business was then discussed and dealt with.

The Council ordered the purchase of more ploughs to be used in the reconstruction of bridges which were washed out in the spring floods.

John Atkinson, weed inspector, was present and drew the attention of the Council to the appearance of Hoary Cress in isolated parts of the Municipality. A motion was passed to the effect that Mr. Atkinson, in conjunction with the Provincial Weed Inspector, be given authority to take whatever measures necessary to eradicate noxious weeds, including the hoary cress.

A communication from the Superintendent of Maintenance, Department of Public Works and Roads, was read to the council that there would be no road grant this year to the municipal district.

Relief matters and accounts were dealt with by the Council before adjournment.

Rev. and Mrs. McDonald motored to Brooks Tuesday and returned in the evening.

The Carbon Golf course will be cleared of some of the buck brush on the fairways in an endeavor to make the game more enjoyable.

Today, Thursday, is the King's birthday and a bank holiday in town.

The community swimming pool is attracting a number of swimmers on the hot days and patrons are reminded that their season's tickets are now due and payable to the secretary, R.C. Downey.

A large number of Carbon and district residents took in the show "Guns With the Wind" being shown at Drumheller this week.

GRASSHOPPERS INACTIVE

Although the Carbon district is one of the poorest infested areas by grasshoppers, a few years ago, it appears that the pest is pretty well under control, for the present at least.

A late, wet spring and recent June rains have been largely responsible for the control of the pests, and reports state that very few hoppers are active at the present time.

The Municipal District of Carbon is ready to open the bait mixing station if necessary, and a small amount of material is on hand for this purpose.

THE WORLD OF WHEAT REVIEWED WEEKLY BY MAJOR H.G.I. STRANGE

The season for summerfallowing is here. Because the most important factor which limits the yield of all crops is moisture, summerfallowing is usually performed in order to conserve extra moisture in the soil for next year's crop.

Records show that the best rains fall during the month of June, and often at Kanamooka, which is late, therefore, that summerfallowing should be done as early as possible in June, for the single reason that much of the rain which falls on a field before it is summerfallowed is lost by evaporation from the hot air when the soil is turned up during the operation of ploughing or cultivating.

Keeping in mind the importance of conserving moisture in the soil, it is obvious that the less the summerfallow is disturbed after the first mowing or cultivating, the more moisture it is likely to be conserved, and so the higher the crop yield will be the next year.

At the same time, the summerfallow must be done during the season to keep down the heavy growth of weeds, for tall weeds can easily steal a great deal if not all the moisture that the summerfallow has conserved.

RED CROSS SOCIETY NOTES

NEED FIFTY AMBULANCES

The following information has just been received by telegram from our National Headquarters:

"Direct proof of the terrible danger on equipment in the evacuation of Red Forces from Northern France and Belgium comes in an urgent appeal from the British Red Cross to Canada for immediate supply of FIFTY AMBULANCES. The appeal comes by cable to Canadian Red Cross Headquarters."

Already a number of the Fifty have been donated, and this is a splendid opportunity for individuals and organizations seeking some special exertion through which assistance to the Allied effort can be given. The demand is an immediate one and the cause most practical.

The cost of such an ambulance, of standard military type, fully equipped, is in the neighborhood of \$2,750. Full details may be secured from Canadian Red Cross Headquarters, Toronto, or from the Alberta Division Headquarters at Calgary.

Miss Inez Sobey has returned to Carbon after completing her teacher's training at the Calgary Normal school. Miss Sobey is now practicing teaching at the Avondale school.

Studly Harney left Monday for the Edmonton district after spending the past couple of years in Carbon, where he was employed for some time with Garrett Motors.

Mrs. Aaron Klassen and Lamine of Calgary are visiting in Carbon at the home of Mr. and Mrs. I. Mortimer.

Mrs. and Mrs. Downey, Mr. and Mrs. Bessant and Cyril O'Hanlon met at the Edmonton Tuesday where the gentlemen members of the party will attend the Masonic Grand Lodge meeting.

LONG YEARS AGO

June 15, 1929

Henry Johnson has moved the old Bank of Toronto building to its new location near the Masonic hall, and he is now preparing the old post office building (next to Chronicle office) for removal to the corner site formerly occupied by the bank building.

Carbon Elks will sponsor a monster Stomped and carnival in Carbon on July 1st and 2nd.

The Carbon Golf Club has commenced work on the re-surfacing of the greens. A new experiment is to be tried in an endeavor to kill the grass on the greens, in which Allotment Wood killer will be used. (Note—it didn't pan out).

The Carbon and Heeketh tennis clubs held an enjoyable tournament at the latter town last Sunday.

TENNIS CLUBS NOW HAVE THREE COURTS CLEANED AND PLAY HAS STARTED

Junior Tennis Club Has 21 Members and a Court

The Carbon Junior Tennis Club is now active and has 21 members. Miss Mabel Nash is the president of the club, and Mr. H. Larsen has been supervising the work on the court. There is no membership charge, but dues are paid in hours of work, and the boys and girls have helped to clear off their court and put it in shape for play.

The Carbon Tennis Club also has been active of late and two courts have now been cleared off and tapers laid. Play has started for the summer and it is to be hoped that a successful season will result.

CARBON AND DISTRICT NEWS NOTES

Ivor Williamson, who has been on guard duty at Kanamooka, visited in Carbon last week with his brother-in-law and sister, Mr. and Mrs. C. Moorehouse.

The Duke of York Chapter I.O.O.F. held a fairly successful dance last Friday night despite the bad roads due to rains. Anderson Sisters furnished the music and we understand that the ladies cleared around \$15 on the undertaking.

Mr. and Mrs. A. F. McKibbin left Sunday for Edmonton where Mr. McKibbin is attending a Pharmaceutical Association convention.

Mr. and Mrs. J. H. O'Hanlon returned Sunday from a short visit in Calgary.

Mrs. W.H. Williamson returned to Carbon Sunday after spending the past few weeks in Eastern Canada.

The Carbon W.A. will hold a supper in the old bank building, Carbon, on Saturday, June 15th commencing at 6:30 p.m. Admission, Adults 35¢; child, 20¢.

Born to Mr. and Mrs. C.H. (Bob) Poole of Cumberland, B.C., in the General Hospital, Cumberland, on Saturday, June 1, a daughter, Mary Margaret.

Rev. David of Arms conducted the services in the Carbon United Church on Sunday, June 9th.

Carl Moorhouse has joined the Canadian Active Service Corps as a truck driver and he left Monday to complete his examinations.

HERR HITLER'S PRAYER

(From Blairmore Enterprise)

Gott! Dear Gott! Adornings, bleas! Thy harrier Hitler's here, Und has a word or two to say Indo your private ear. So darn away all oddsers now Und lates vill to me, For what I say concerns me much, Meinself and Shermany.

You know, dear Gott, I vas your freind, Und from mein hour of birth I quietly let you rule der Heffan, Vile I rule o'er der earth. Und when I toldt mein soldiers Of bygone battle days, I gladly split der glory.

Und I say you half der bratse. Now vot I say, der Gott, is dis: Dat ye shouldst still be friends, Und in mein spirit to seek sein foes.

To meet der bitter ends, If you, dear Gott, vill dis mein do, I'll nudlings ask again; Und listen vill to me, Vor offermore, Amen.

But listen, Gott, it must be quick Your help to me you send, Or else I aff ter stop attack Und only lay defend.

So fore and dandy: heins I giff Ter make der Allies meek, Und put me safe Indo mein life. Der middle oh der sun.

If you do this, I'll do mein hart—I'll der vorld der fast; But if you don't den I must tink It is a hostile act.

Den vas in vinger I vill declare, Und send mein bomber ships to vage A vight up in der skies.

Dis ultimatum now, dear Gott, Is vas ve many more. Mein mind is settled up to clean Der whole world off der floor. Because you vas mein harrier, Gott, An extra schance is giffen; Und bel at vance, or else I'll be Der emperor of Heffan.

LODGE CALICO DANCE JUNE 28

The Lady Roberts Chapter I.O.D.E. will sponsor a "calico" dance to be put on at the Farmers' Exchange hall, Carbon, on Friday, June 28th. Purdy's orchestra of Calgary has been engaged to furnish the music and proceeds of the dance will go towards war work. Remember the date, and don't forget that a worthy cause is being promoted.

MAY WHEAT SITUATION COMMENTED ON BY THE SEARLE GRAIN COMPANY

The price of 1 Northern in store at William was 75 1-2 cents a bushel on May 31st, as compared with 88 3-8 cents on April 28th, a decline during the month of 15 1-4 cents a bushel. This decline was brought about wholly and solely by the sudden march of Hitler's great mechanized armies into Holland, Belgium and northern France.

BOY SCOUTS NEWS NOTES

In view of the Scout School that is being held Friday, June 21st, it is thought that all members of the Scouts and Cubs turn up to their respective meetings on Saturday so that the full programme can be settled.

ENGINE ROOM, STOREHOUSE MEN WANTED BY NAVY

In the past entrance into the Royal Canadian Navy has been restricted to youth, but now comes a chance for those of mature years. The middle-aged man can now see service with the Navy providing he meets the necessary physical requirements and has Marine, Engine Room or Storehouse experience.

It has been said that the Royal Canadian Navy can be likened to a select club because of the long waiting list of applicants and requirements.

But the great expansion of the Naval force is changing such conditions. The many vessels under construction will need men, and in particular, trained men with Engine Room or Storehouse experience.

PENALTY ON TAXES IF NOT PAID BEFORE JULY 1

Those in arrears of Village and School taxes are reminded in an advertisement in this issue of the Carbon Chronicle that after July 1st a penalty of four per cent will be added.

Mr. J. Atkinson Sr. and Ralph were in Calgary last Thursday attending the Calf Club show.

Death On The Highways

The fearful carnage that is the accompaniment of warfare among the belligerent armies on the battlefields of Europe is the subject of shuddering comment daily among the people of this continent. "Is it awful? Is it terrible?" are the queries heard as men and women listen to radio reports of the conflict and scan the headlines of the daily newspapers.

Yet the slaughter which is taking thousands of lives on the highways on this side of the Atlantic and a growing toll at that is passed over with-out comment, or with nothing more than a shrug of the shoulder. People have become so used to reports of accidents in which two or three are killed here and there, or a few lives are lost, together with a few more injured, that they have not awakened to full realization of the loss of life in the aggregate caused by the automobile.

Despite the safety campaigns inaugurated by police forces, motor clubs and groups of citizens who have sufficient faith in their command to appreciate the dire peril which attends the motorist when he fares forth on American and Canadian highways, there appears to be no let up in loss of life and limb. On the contrary, recent figures indicate that the menace is becoming greater year by year and month by month. Already, before the holiday season, when the peak of traffic may be expected, indications are that the grim harvester will take a bigger yield on the highways this year than in 1929. It is already a matter of record, for instance, that serious road accidents in Ontario in February of this year totalled 1,228 as compared with 806 in the corresponding month a year ago, a startling increase of approximately 50 per cent.

Unfortunately there is nothing to indicate that the situation will not become progressively worse as the summer wears towards fall, and insofar as the Canadian highway menace is concerned it is likely to be accentuated with the influx of a much larger number of American tourists who are obliged, because of war hazards abroad, to spend their summer vacations on the roads of this continent.

Roads Or Drivers?

Very properly the Canadian governments, boards of trade and other organizations are doing their utmost to influence the American tourists to turn their wheels in the direction of this country this summer. It is a traffic which should be encouraged for economic reasons as well as in the interests of cementing the growing friendship between the peoples of the two great North American nations. Indeed, freer communication and closer contacts between Canadians and citizens of the United States may go a long way towards amplifying and encouraging the sympathy which the latter feel towards the Allied countries and the principles for which they are fighting. But, as has already been intimated, there is an element of danger which must be avoided, if anything can be done to minimize the risks of the road in this country.

The difficulty is to know what to do about it. Punishments for carelessness and more restrictive legislation do not appear to be the answer to the problem. Even safety first campaigns conducted through various agencies do not seem to be as effective as they might be, although their objective, that of awakening the motorist to the consciousness of his responsibility, is all to the good.

One school of thought interested in the problem has suggested that much of the blame should be laid on the highways should be placed on the highways themselves. These authorities assert, and with some degree of truth that high speed, high powered and efficient automobiles have outstripped the roads on which they are used. In other words, road designing and road construction is not keeping pace with the rapid improvements to the automobile.

On the other hand there are those who contend, likewise with some truth to support their assertions, that the driver is to blame for most of the mishaps on the highways. They say that nearly all accidents are the result of negligence on the part of the driver and quote statistics and results of surveys to show that the accidents are the result of inefficient equipment such as slack brakes, steering accelerators and the like. They declare that what is needed to make the highways safe for travel is re-birth of the motorist—a new spirit on the road.

Two Main Requirements

It is quite evident that the automobile is efficient and that both the highways and the motorists must share the blame for accidents. If accidents are to be cut down as the volume of traffic continues to grow, roads and highways must be designed and built to meet, not the immediate needs of the present day, but those of the years to come and at the same time drivers must be imbued with a greater measure of common sense, courtesy and carelessness than have guided their actions on the roads in the past.

When modern highways, built to match the requirements of the present day automobile, and of the future, are completed and the motorist has acquired more common sense, then, and then only, will the roads of the country be really safe.

Nothing Is Wasted

London Stores Employ People To Tattle Knaves In Sting

Wartime has created a new job in England. Many of the big London stores and business firms have appointed full-time undercover reporters to the London Daily Sketch. The work consists of untying thousands of knots, disentangling thousands of yards of string. Rope and string thrown away in peace time, is now carefully kept, since supplies are cut down to about a third of pre-war requirements.

Entertainment For Troops

A preference for entertainment by members of their own regiments has been shown by Canadian troops in England. While pre-war entertainers have been given an enthusiastic welcome, home-brewed concerts, with Canadians as performers, are the most popular.

Flax flowers are blue, pink, or white, depending on the variety.

War On Cats

Kansas Has Been Having Trouble With One Enemist

They have been having a cat-war in Kansas—a war on cats and a war to protect cats. An order had been issued by the State Fish and Game Commissioner to have cats killed, because of their destruction of game fowl. But instantly a vast protest was made by farmers, women's organizations and cat lovers and cat clubs, and the commissioner was compelled to rescind his order. Farmers published advertisements in local newspapers warning sportsmen against hunting cats on their farms.

"No hunting" signs were put up on farms. The State's game department had been killed the largest number of cats and crows during the summer. There has been no outcry against the proposed open season on cats, but the cats are not to be classed with crows, despite the fact that they delight to feed on quail.

Mean Thieves

The signature of Queen Mary, prominently displayed in the open book signed by prominent visitors to St. Mary's, has been stolen. Church authorities reported that the book had cut from the book two complete pages containing the signatures of the Queen Mother and her husband-in-waiting, the Duke of Edinburgh.

German dentists are being schooled in the use of artificial resin to replace gold and other metals used in dental work.

According to stylists, trousers of British schoolboys of the future will contain no pockets.

Red Cross Blankets

Need For Woolen Blankets For Refugees Is Most Urgent

Once again the rallying cry of "Help the Red Cross" has rung across Canada. This time it came direct from France to Toronto and the west received it within the hour. The appeal was so urgent for the thousands of almost starving and almost naked refugees that it could not possibly be met from mills and stores. Every housewife in Canada has been asked to do her bit and then, the last bale is shipped it is pretty safe letting there will be nothing in all the west for the months to feast on this summer. The cry reached the west just as the good housekeepers had all the blankets washed or cleaned and were about to store them for summer. Merchants had ordered their supplies into moth proof storage during the first week of June.

What happened when the depots opened was that givers were waiting with their handies. Men, single men, were rushing through the first open door of the stores where blankets could be bought. The instructions were very simple, very clear, very explicit. The need is for all wool blankets, double or single, new or not too much worn and clean. The used blankets must be kept together and the new likewise and each blanket marked as to whether it was new or used.

In the country districts where the call could not reach the Red Cross headquarters it will be safe to ship any wool blankets that can be spared to any Red Cross headquarters. That what is sent must be wool blankets is made very definite. Just why other covering will not be taken at present no doubt will be explained later.

SELECTED RECIPES

JELLIED TUNA MAYONNAISE

2 teaspoons gelatine
1 cup cold water
2 cups boiling water
2 tablespoons vinegar
2 tablespoons salt
10 Christie's Soda Wafers, crumbled.
1 cup mayonnaise
1 cup tuna fish, flaked
1 cup minced celery
Soak gelatine in cold water five minutes and add boiling water, vinegar, salt and crackers. When slightly thickened, add the mayonnaise and fold in the fish, onion and celery. Turn into mould. Chill until firm. Unmould on crisp lettuce. Garnish with more mayonnaise if desired. Six portions. Preparation 10 minutes.

ALL-BRAN HONEY ORANGE BREAKFAST

2 tablespoons shortening
1 cup honey
1 egg
1½ tablespoons grated orange rind
2½ cups flour
2½ teaspoons baking powder
½ teaspoon soda
1 teaspoon salt
¾ cup orange juice
1 cup Kellogg's All-Bran.
Blend shortening and honey; add egg and orange rind and beat well. Sift flour with baking powder, soda and salt and add to first mixture alternately with orange juice. Add All-Bran. Pour into greased loaf pan and bake in a moderate oven (325 degrees F.) for one hour and 10 minutes.
Yield: One loaf (5½ x 9½-inch pan).

A Promising Future

The Dionne Quintuplets Now Approaching A New Era
And now a new era . . . girlhood commences to unfold for the quintts. Their present state of health, wealth in hand and assured, and the care being exercised by their parents and guardians in their rearing ensures a highly promising future. They are going to school, entering a period of scholastic and cultural training that will have a strong influence in mapping their careers.

With all the quints do so well in school, they will have a lot to say in the matter of their activity in adulthood . . . and it may not be long before they commence to assert themselves along that line—North Bay Nugget.

Learning To Read

Research at the University of Chicago shows girls learn to read more quickly than boys, not because they're more intelligent, but because they can distinguish letters more readily. And 6½ years is the last age at which to begin reading.

"Fowls can be kept in nine out of ten back gardens," insists an expert. The tenth, of course, is the one belonging to the person who owns them.

Pigeon races have been held in England with as many as 30,000 homing pigeons competing.

INDIANAPOLIS RACE AGAIN WON ON FIRESTONE

Into the gruelling 500 miles, over a rough, hot, brick track at the Indianapolis Speedway, are packed all the strains and wear of 50,000 miles of ordinary driving. Tires have to withstand quarter-mile blows not only once but hundreds of times per minute!

With this proof there can no longer be any question of which tire is safer. One tire—and only one—has the exclusive safety features to withstand punishment of the kind—Firestone tires that have been on the winning cars at Indianapolis for 11 consecutive years. Have the nearest Firestone Dealer put Firestone Champion tires on your car now. Spend Firestone when buying your new car.

When Life Depends on Safety—it's Always.. Firestone

Proper Hospital Nurse (misquoting): "What have you been doing, Ellen?"

Ellen: "I've been eating my doll's slippers, so I've been punishing him." Nurse: "How?" Ellen: "I've been to his kennel and drunk his milk!"

The first cat from bridge ever made is still in use in the Severn valley, England. It was cast in 1779.

...AT MYSELF

"The purity of the foods I serve has always been a source of personal pride. But the vital importance of pure waxed paper never struck me."

Scaring residents out of homes and buildings, burglars in London, England, are reported to be pulling all wall clocks and shifting furniture, an earthquake shock, Arctic port 1,700 miles north of Edmonton, on May 25.

There were 451 people killed on roads in Great Britain during April, compared with 514 in March, and 406 in March this year. Only 178 were killed in the blackout, although 235 were blackout victims in March.

Sir Ernest MacMillan, principal of the Toronto Conservatory of Music and conductor of the Toronto symphony orchestra, said he had not played any work by any modern German composer this year and intends to continue excluding them.

FREE--To All Readers

A Valuable Book Entitled "Food For Health" Now Available

A book, by doctors entitled "Food For Health" that is genuinely useful and written so you can understand it, is now available to all our readers--free of charge.

It actually lists men feeding two adults and five children healthily at 22¢ a day, per person, and is full of good information.

The idea is to tell us how to live simply and well, as to avoid such a plague as is now sweeping the world in the form of Flu in 1919 after the Great War.

If every Canadian would eat the proper foods in the proper quantities (set forth in the booklet) the consumption of Canadian grown foods would be increased.

You should be able to get this "Food For Health" book through your local doctor, medical health officer, Red Cross worker, or life insurance representative, and we strongly advise you to do so as it's interesting, useful and a money and health saver.

If you can't get it, write Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

Junior Farm Clubs

Phenomenal Progress Has Been Made In The Movement

If there was nothing new in the whole gamut of agricultural development, that showed improvement, the phenomenal progress being made by the junior farm club movement throughout Canada, as exemplified by the official report of the committee one of the great features of agriculture in our time. The report for 1929 states that the membership was 45,314, compared with 37,274 in 1928, an increase of 21 per cent. In 1921 the membership was 21,142, so that in the short space of eight years it has been doubled-- Vancouver Sun.

Nation-Wide Appeal For Blankets

Brings Quick Response

The nation-wide appeal for blankets for equipment of French hospital beds recently launched is resulting excellently in Saskatchewan. There has already been received more than 250 blankets. The express companies are delivering numerous packages three or four times a day to the Provincial Depot at Regina. It is a special way the population can meet an emergency, such as the Red Cross is expected to provide for. The blankets received were on the way to the seaboard within a day of arrival. Large quantities are expected each day from Red Cross branches and believe the total from Saskatchewan will be very large.

At a special meeting of the Advisory Committee of the Saskatchewan Red Cross a further \$100,000 was voted to be sent to the National office of the Society in Toronto for financing overseas emergency commitments, which the Red Cross of Canada has been called upon to make in aid of the British Red Cross and the French Society endeavoring to meet the tremendous task of caring for all the French and Canadian casualties requiring hospitalization.

Polish Black Book

Reveals Of Unpleasant Accidents Committed By Germans

Germany is attempting to exterminate the entire Polish race to make room for its own people. It was charged in a Polish "black book" issued in New York.

The first installment of the black book was published by the Monthly Polish-American magazine.

It was prepared by T. P. Bennett and Anthony Tarnowski, of the Polish Information center attached to the Polish consulate in New York.

It estimates that the campaign and occupation of Poland took the lives of 1,000,000 Polish children and 320,000 officers and soldiers. It claimed that 4,000,000 civilians had been deported from their homes in the old Polish corridor 100 at a time in sealed cattle cars built for 50.

Since the war began, 50,000 civilians have been executed. The book charged, and 76,000 persons are now suffering from hunger.

The publication accused the Nazis of "inhumanly stopping the natural increase of Polish population by forbidding young people to marry, and by expelling thousands of children to famine."

More than 5,000 stars nearest the earth, including many visible to the naked eye, are only half or a third as far away as previously believed.

Charles, Edward, George, Henry, John, Joseph, James, Robert, Thomas and William are the 10 most popular male names in America.

This summer and autumn Portugal is to celebrate the 80th anniversary of the birth of the Portuguese King in 1149. There is to be an exhibition of the Portuguese world. The great days of Portuguese history will be made occasion for special celebrations. These great days include the expulsion of the Moors, the achievements of Prince Henry the Navigator and Vasco da Gama, who sailed adventurously to discover a route to fabulous India, the circumnavigation of the globe by Magellan, the winning of Brazil for Portugal, and the establishment in the New World of a vast empire.

The situation in Portugal, on the edge of the mysteries of the Great Unknown, has long been a topic of interest to the Portuguese to go to distant places. In the course of a single century the Portuguese reached the farthest reaches of the earth. They colonized the Azores, the Cape Verde Islands, the Azores; they mapped the practically unexplored coast of Africa; they discovered the Australian continent; they visited Abyssinia; they found a new world in Brazil; they found a new way to India; they discovered Greenland; they found a new world in the South of China. Her present position is a result of the fact that she is not preventing Portugal from recalling her glorious history and place in the map.

Some day soon you may be offered an investment opportunity which will make you a millionaire. You may be offered a chance to become a millionaire by installing a "money" in beer parlors, cocktail lounges, and pool rooms, and perhaps a road in the United States a dozen companies are engaged in this sort of enterprise. At the head of one of these companies is a man, a member of the American press. These new mechanisms are likely to replace the half-million photographic plates now on the insertion of a nickel in a slot machine, and the new mechanism is likely to replace the slot machine and the new mechanism is likely to replace the slot machine.

Royal Military College

Kingston To Change Course From Four Years To Two Years For Duration Of The War

Royal Military College, the Sandhurst of Canada--will carry on for the duration of the war on a basis of graduate study, and will carry out different standards of graduation.

The college course to train young men for commissioned rank in the armed forces has been reduced from four years to two for the duration of the war. That means about 100 will graduate each year from the institution on Point Frederick, just east of Kingston, instead of 50 as in peacetime.

Summer vacations have been shortened and instruction in some cultural subjects and engineering has been curtailed. However, the military education of the two-year war graduate will equal that received by the four-year peacetime graduate.

On the academic side the two-year men will be qualified to enter the second or third year of engineering and arts course in Canadian universities whereas the four-year men were equipped to enter the third or fourth year of such courses.

All graduates are expected to accept commissions in the army, navy or air force or enter the air force under the British Commonwealth Air Training plan. Their training for the first two years will be in places them in a position from which they can readily complete their education.

On graduation cadets will go to officers' training centres for the various services or branches of the service. Most of them will be sent to the right age. The minimum age for entry to R.M.C. in wartime is being lowered from 16 to 15 years.

Months, but owing to the academic standards necessary for admission fewer can so young.

The average age for entry, with junior or senior matriculation, is close to 18.

One Way To Help

Man Puts Extra Postage On Letter To Help Win The War

A novel and effective way of helping Canada fight its war has been adopted by a Windsorite.

He pledges himself to buy at least one ten-cent postage stamp a week for the duration of the war.

Stamps will be placed on letters which already bear the required postage.

This reader of the Star has found his own way to do his bit quietly, and his originality is a pair of words which he has used to describe his plan.

He spends in this way goes directly to the Dominion treasury, as current revenue. No repayment by Canada is required. It is as simple as a thoughtless outright gift--Windsor Star.

Boys are being taught farming on school land in England.

I Read--And Write--For You

By JOHN C. KIRKWOOD

are ten subjects on a "real." If kept going continuously the "take" which they were formed by the "phonon" device, which will play music and show pictures at the same time, anticipate fantastic profits from the machine.

But before you put any money into a company making and/or operating the new mechanism, it might be wise to inquire into the history of that other somewhat similar enterprise--the making of a dozen or so photographs of yourself for 25 cents each, sitting in a gauzy booth while the camera did its stuff. When these "phonon" companies began operations, they were supposed to make unlimited millions of dollars in shares in them, yet one does not hear so much about these photo-taking machines now.

Those Norwegian fjords about which we have been reading so much lately were formed by glaciers, which melted away in a long past, the sea flowed into the valleys thus made. These fjords cut into the mountains for 100 to 150 miles. The largest and longest of them has a length of 112 miles, and the edge of a plate, or with a hammer head having a studded surface. The new mechanism is likely to replace the slot machine and the new mechanism is likely to replace the slot machine.

SUNDAY SCHOOL LESSON

JUNE 16

HAGGAI URGES THE BUILDING OF GOD'S HOUSE

Golden text: Let us consider one another to provoke unto love and good works, not forsaking the assembling together, as the custom of some is. Hebrews 10:24, 25.

Lesson: Haggai. Devotional reading: Psalm 122.

Explanations and Comments

It Can Be Done, Haggai 1:1-11. The prophet Haggai was sure that the time was the time God would build the temple. They were waiting for the right time to build, but they had not waited for the right time. Haggai urged the people to build the temple, and he reminded them. Some of them had built exceptionally fine houses panelled with costly cedar, but the site of the house of Jehovah was still lying waste, although they had now been living for 15 years in Jerusalem. The trouble was that they lacked the desire, and Haggai used forcible words to arouse the desire. If they really desired the temple, they would build it.

It Was Done, Haggai 1:12-15. Within three weeks the temple site presented a busy scene, for inspired by the prophet's words, the governor and the priest and the people all began to work upon the temple.

Four weeks after commencement of the work came the Feast of Tabernacles, and on the eighth day of the Feast, when all the people were assembled in Jerusalem, the governor and the priest and the people all began to work upon the temple.

Seven weeks after commencement of the work came the Feast of Tabernacles, and on the eighth day of the Feast, when all the people were assembled in Jerusalem, the governor and the priest and the people all began to work upon the temple.

Seven weeks after

PRODUCTION OF TANKS IN CANADA MAY BE STARTED

Ottawa.—Steps are being taken immediately to settle the question of tank production in Canada, Hon. C. D. Howe, munitions minister, told the commons.

He said a delegation of engineers is expected to leave for the United Kingdom by the next boat and go into the question thoroughly and settle it "once for all".

From experience of the past weeks the British now have developed a 40-ton tank which they believe is an effective tank under modern conditions, a tank suitable for Canada to copy, the minister said.

Even after information is obtained and all possible help has been secured outside of Canada, it will still be an exceedingly complex job for Canadian industry to build tanks," said Mr. Howe. "No one will be called upon to do the job. The job will mean the collaboration of the heavy industries of this country."

"Mr. Howe told the House of Commons last May 28 that specifications for a heavy tank, known as a 'mark 3' or 'Bullantyne tank', had been received in Canada from Britain in January. But before production could be started the order for 100 such tanks was withdrawn by the British war supply board on April 2, after the tank design had been altered."

(At that time Mr. Howe said it had been decided to build a regional plant in Canada to undertake that order was the Angus shops in Montreal and the Canadian Pacific Railway, which owns the shops, had stated it would undertake the work and immediately placed its engineers on the job of organizing the plant.)

"The situation as regards tanks is this," Mr. Howe said. "Canada can undoubtedly make a tank—and tanks are made in the United States. However, we have in Europe a battle of tanks which is developing some new facts about tanks as weapons of warfare."

"For every tank that is invented a gun is shortly afterwards invented to deal with that particular type of tank and the effectiveness of tanks in the field depends on their being good against the latest type of anti-tank gun."

British experience in the field had resulted in a change of ideas as to what constituted "the effective tank for warfare of this day," and these ideas differed widely from those of the United States military authorities.

"The academic question whether tanks can or cannot be made in Canada depends on its answer, and the type of tanks you have in mind and I presume that a great many of the differences that have arisen in discussions here have been due to the fact that some people have one idea of a tank and I have in mind another."

"We can produce tanks in this country alloy steel up to a maximum thickness of two inches. The type of tanks that I have in mind (40 tons) has armour steel of more than twice that thickness."

"We produce gasoline engines in this country that will give the kind of a tank. The tank I have in mind is propelled with a Diesel engine much larger than anything we have produced in Canada."

"It is folly to say that we cannot produce Diesel engines in Canada. Canadian industry can do anything provided it is given sufficient time and development expenses. It can be done but it may not be of much help at the moment."

Work has begun on a new military motor vehicle order involving an expenditure of \$10,000,000, a government announcement said.

Chassis and engines are being produced by the Ford and General Motors companies, while other companies are working on wheels and tires. Specifications for the special bodies involved are being prepared.

Agrees To Appointment

Moscow.—Premier Vyacheslav Molotov announced the Soviet Union has agreed to the appointment of Sir Stafford Cripps as the new British ambassador to Moscow. Sir Stafford is a left wing Labor member of the House of Commons.

Belgian Troops Fight

Paris.—Belgian General Legros reported to Belgian Defence Minister Henri Denis that about 45,000 Belgian soldiers joined the Allied forces in Flanders after King Leopold's capitulation.

Commander Trucks

Paris.—All new trucks available in France were consigned for the army. Purchase licenses for private enterprises were suspended.

French Cabinet Shuffle

Premier Drops Edouard Daladier From The Government

Paris.—Premier Paul Reynaud reshuffled his cabinet, dropping former Premier Edouard Daladier from the government and taking for himself the portfolio of war minister and minister of foreign affairs.

Daladier had been foreign minister in the Reynaud government.

Dropping of Daladier, who held the war ministry in the first seven months of the conflict and was president during the Munich crisis, was the most striking change made by the French premier. Daladier has been under fire for some time for his role in pre-war French politics and preparations.

General Charles de Gaulle, who became Reynaud's chief assistant at the war ministry, was promoted from the rank of colonel May 25. At that time he replaced one of 15 generals ousted by Reynaud in the drastic house cleaning of the French army that was instituted after the German breakthrough at Sedan.

The new minister of information, Jean Provost, is publisher of Paris's most powerful French evening newspaper.

Train Air Pilots

Flying And Training Organization Heavily Expanded

London.—Sir Archibald Sinclair, secretary for air, told the House of Commons that the flying and training organization of the Royal Air Force is being expanded "on a considerable scale" to meet "all further requirements."

Sir Archibald said a large number of training schools have already been or are in the process of being established, and that the number of personnel suitable to the purpose.

Sir Archibald said he had no objection to any "standing" whereby Britain should not be a military objective in Germany until they bombed us.

The Royal Air Force, he said, had made "a number of successful attacks against military objectives in Germany."

New Kind Of Army

Call For Recruits To Fight For Good Against Evil

London.—Major-General L. W. Ampe, director of the auxiliary military pioneers' service, Royal Engineers, called for recruits of all ages for a new kind of army to fight for good against evil. General Ampe spoke to an enthusiastic audience of 1,200 at the Battersea Townhall, supporting the mayor's moral re-armament campaign to strengthen morale.

"Each of us," he said, "if we are to see to it that our country must look to ourselves to see if any of the things against which we fight—dishonesty, selfishness, greed—still exist in us."

Other speakers included Phyllis Konstam, wife of Bunny Austin, the tennis player; wives and mothers in the services; and factory workers.

Labor Ministry Decree

Britain To Control Any Interference In Industry

London.—Clement Attlee, lord privy seal, announced to the House of Commons a new labor ministry decree controlling the hiring of workers in mechanical industries, building, public works, agriculture and coal mining.

"The object of the order," Mr. Attlee explained, "is to prevent interference with production in engineering, building and civil engineering by unnecessary movements of workers, and to enable labor resources to be directed to points where needs are greatest and most urgent."

As regards agriculture and coal mining, the object is to retain workers at present engaged in those industries and bring back those formerly employed in them who fall out of employment elsewhere."

Set All-Time Record

Churchill, Min.—An all-time record for early break-out was established here June 4 when the ice went out of the harbor. This was earlier by seven days than the previous record set last year. Boats may now be anchored at the dock of the northern approach without ice interference. Churchill river is running free to the sea.

Rotary Contributes Ambulance

Calgary.—Fifteen minutes was all the time necessary for Calgary Rotarians to contribute \$2,146 to purchase and fully equip a Red Cross ambulance for use in war torn areas of Europe.

ACTION IS TAKEN FOR SUPPRESSION OF ILLEGAL GROUPS

Ottawa.—Outlawing of more than a dozen organizations, including the Communist Party and the National Unity Party, under the Defence of Canada regulations, was announced by Justice Minister Hon. Ernest Lapointe in the House of Commons.

These organizations would be illegal on publication in the Canada Gazette of the order-in-council amending the Defence of Canada regulations to that effect, Mr. Lapointe said. After that publication any person being a member of any of these associations or groups would be guilty of an offence against the regulations.

The list included several foreign language organizations, as well as the Canadian Labor Defence League, the League for Peace and Democracy, and the Young Communist League.

The Communist Party was already an illegal organization under a judgment of the court in 1931. It was outlawed, delivered at Ottawa last month following the conviction of three men on charges arising out of the distribution of anti-war pamphlets.

The men were Harry Binder, Communist newspaperman, his brother, Louis Binder, former editor of the Ottawa unit, and Arthur Roy Saunders, a civil servant.

The organizations declared illegal are: Auslands Organisation of the National Sozialistische Deutsche Arbeiterpartei; Deutsche Arbeitsfront; the Canadian League for German Culture (Deutscher Bund für Kanada); National Unity Party; Canadian Union of Fascists; the Communist Party of Canada; the Young Communist League of Canada; the Canadian Labor Defence League; the League for Peace and Democracy; the Ukrainian Labor Farmer Temple Association; the Finnish Organization of Canada; the Russian Workers' Club; the Croatian Cultural Farmers' Club; the Hungarian Workers' Club; Polish People's Association; Canadian Ukrainian Youth Federation.

The new regulation also provides that in any prosecution under it if it is proved an accused person attended meetings of an illegal organization, spoke publicly in advocacy of it, or distributed its literature, he shall be presumed to be a member, in the absence of evidence to the contrary.

Another amendment to the regulations designed to strengthen the hands of the Royal Canadian Mounted Police provides that all commissioned officers of the R.C.M.P. must be justices of the peace for the purpose of issuing search warrants.

Will Be Investigated

Britain Looking Into Ford's Proposal

London.—The ministry of aircraft production has instructed its inspectors in the United States to "investigate fully any proposition" Henry Ford might make to the British government in connection with his recent assertion that his company could produce 1,000 aircraft daily within six months.

The disclosure of the inquiry was made by the ministry's parliamentary secretary, J. J. Lewellin.

PREMIER KING GREETS FRENCH MINISTER

AIR PROTECTOR

A world war naval hero, Admiral Sir Edward Evans, above, was named by Lord Beaverbrook, British aircraft production minister, to take charge of the "local protection and security of England's aircraft factories and airbases."

Parachute Troops

Report Says That Majority Of Those Dropped In Holland Were Killed

London.—Authoritative sources, basing their estimates partly on the evidence of German prisoners, said a majority of the German parachute troops dropped in Holland were killed. "Amazing examples," it is quoted, these sources, included a case of 10 infantrymen in one plane of whom only one person survived. In another, they said, of 10 men who tried to land by hand, three were killed and four were shot when they reached earth.

A British fighter pilot was credited with the air ministry with "wounding" a German bomber into a crash after the British's ammunition had run out. Over the British's aircraft the pilot carried a German Junker but his contrived drums had been emptied. The air ministry said the pilot dove at the Junker's tail and "wounded" the enemy so much by a succession of stunts that ultimately he made a fatal error in trying to turn and crash crashing into the ground."

Strength Of Fleet

Britain's Naval Strength Greater Than At Beginning Of War

London.—Despite the loss of six destroyers in the monumental evacuation of Allied troops from Dunkirk, Britain's total strength in this vital craft is greater than it was at the outbreak of war. New destroyers have been launched faster than they have been lost.

When the smouldering embers were fanned into the flames of war last September Britain had a fleet of 185 destroyers. Six of them were Canadian. Six Australian. Six just then completed for Brazil were pressed into His Majesty's fleet.

Twenty destroyers have been lost by Britain. Admiralty records show that 13 German destroyers have been definitely sunk and that two more are believed to have been sunk. However, their losses do not compare as the Nazis had only 22 heavy destroyers at the start of the war. A number of others they claim for the war are really torpedo boats.

Military observers, stressing that parachutists are Germany's most daring and resourceful troops, had questioned the wisdom of the government's earlier scheme of sending stripings and oldsters armed with rifles to fight them.

As important as the troops to the general plan of defence is the government's drive to recruit fifth columnists in the low countries and France left food, gasoline and directions at strategic points for the invading Nazis and caches of arms and ammunition for parachutists.

Germany has been requested to dig ditches in pastures to hinder the landing of German troops and planes and they do with many a curse at Hitler.

They have been asked, also, to scatter haystacks over the fields in order to make it difficult for the invaders to leave harrows, reapers and other farm implements where they will cause the most inconvenience to any invaders from above.

As the farmers comply, the neat English countryside is transformed into a landscape that looks like the aftermath of a hurricane.

The government is buying up surplus livestock in certain counties at Ottawa and can be seen above when he was welcomed to the Canadian capital by Premier King.

Refugee Children

Plans Have Been Formulated For Care Of Children In Canada

Ottawa.—Plans have been completed for fullest co-operation between Canadian organizations in receiving and placing throughout the Dominion thousands of refugee and British children when the British and French governments are agreeable to their movement. Hon. T. A. Cresswell, minister of mines and resources, announced.

The agreement for fullest co-operation between the Dominion, the provinces and child welfare and other organizations was reached at the Dominion-provincial conference called by Mr. Cresswell. All provinces were represented.

Associated in the conference deliberations were some technical advisers of the child and other welfare agencies which will work with the provinces and the immigration authorities in the reception, placement and after care of the children.

The immigration branch, in connection with the selection abroad of children, will obtain all family particulars as to ensure the retention of identity of children, this being essential should they later return to their own people.

The department of pensions and national health will look after medical supervision in transit, including train journeys in Canada. Provincial authorities and social agencies will come into immediate action at receiving centres to which children will be transported from ocean ports.

The plan visualizes distribution as quickly as possible after arrival so that children can be returned to normal life and private homes. The accomplishment of this task calls for the closest co-operation between the provinces and the national health, the announcement said.

"We cannot afford at the end of this struggle when we have won, to leave men standing in queues at industrial plants and in the streets where to go and what to do."

BRITAIN PREPARES HOME FRONT FOR ANY INVASION

Says Hitler Expected To Defeat Allies Before End Of May

London.—Adolf Hitler confidently expected the capitulation of Britain and France by the end of May, according to the Netherlands legation at Berlin said in an interview here. The diplomat is now stationed in London.

According to this diplomat, the Hitler blitzkrieg machine is running behind schedule. Hitler, he said, expects the invasion of Italy by French and British resistance would be crushed in 15 days following the occupation of Holland and Belgium. Holland was supposed to have been over-run in a day. The timetable did not work this way.

According to this diplomat, more than 15,000 trained parachutists, the diplomat said, and most of these are believed to have been killed or captured. Most of the German troops transport planes, he also said, were lost in the past few months.

Irishmen Enlist

Thousands In Eire Answer The Call To Defend Country

Dublin.—Tens of thousands of Irishmen have answered the call to arms to defend their country. Army officers said they were amazed at the response of men of all ages.

Prime Minister de Valera, who previously has warned against the danger of Irish being used for a base of attack on Britain, said the country is "in imminent danger, against which we might have only a few days to prepare."

He urged intimate unity, declaring, "If we don't hang together we will hang separately."

Gasoline Reserves

Canada Is Holding Huge Stores Of Fuel

Ottawa.—Reserves of high grade aviation gasoline in Canada "now are very substantially in excess of the Royal Canadian Air Force and the Royal Canadian Mounted Police requirements for the coming year," the department of munitions and supply announced.

The reserves have been built up voluntarily by oil companies and the capacity of Canadian oil refineries is sufficient to take care of the expanding needs of R.C.A.F. and the air training plan in 1941 and 1942.

Appeals List Sentence

Paris.—A Paris shopkeeper, sentenced to eight months in jail for making slanders that looks like King Leopold III, before the Belgian monarch capitulated to the Germans May 28, has appealed his case on the grounds he showed "remarkable foresight."

The Channel Tunnel

Old Project Revived In The Light Of Recent Events

It is very well taken for granted now that a tunnel under the English Channel is bound to come, safe from air bombing and making for rapid transit of troops.

The New York Sunday Times points out that when the Channel tunnel was first proposed in Napoleon's time ("this is one of the great things we could do together," the First Consul told Charles Fox), Wellington disposed of it with the argument that England must not court invasion. It is hard to change national psychology. Though England's days of splendid isolation belong to the past, though the country has been in danger of attack from the air for at least 25 years, its military authorities must have faith in the insulating properties of a trough which is only 21 miles wide at Calais and Dover. Indeed, "a statement of policy submitted to Parliament as late as June, 1920, reflected the old fear of invasion 'so long as there are great military centres in France.'" Though it has always been freely admitted that the tunnel could be flooded or the entrance effectively blocked in time of danger, the military advantages have been underrated. Despite the Belgian standstill of 1914, the Channel was not so easily dammed and which found it impossible to accept "a new and expensive military commitment at a time when our resources were strained by the war."

Great Britain has always held that the English Channel must stand or fall as a commercial enterprise. Cost of \$100,000,000 does not seem excessive to use in three days, when billions are spent annually. Yet British business men have always doubted whether the tunnel would pay for itself. At the time the report of 1930 was submitted there was no possibility of enthusiastic support from any large trade industry or interest. Indeed, the farmers of Southern England were distinctly hostile. They were the railway companies and the Channel steamship lines. Yet, somehow, the project was kept alive. They were actually driven on both the French and English sides in 1852, but the work was stopped by the Board of Trade. That the tunnel will be discussed again, after this war is over, there can be little doubt. It was true a generation ago that Great Britain's European frontier on the Rhine, it will be true so long as there are hostile Powers on the Continent. St. Catherine's Standard.

The First Camera

Virginia Said To Be The Birth Place Of The First Fast Action

The first "fast action" camera in the world was one made and used by the late Mr. William Draper. Dr. Draper is credited with the invention of the camera portrait of a living person in 1839 or 1840. When a photograph journal asked the inventor what he thought of the first photographic portrait, Dr. Draper published an answer to this question in that same journal. He explained that he had worked with sensitive plates before anything was published in Europe by Daguerre or Talbot. This was in 1839.

To prove that Dr. Draper's camera was the first of modern type eight years of research was conducted by Hor. Howard C. Cobbs, who was a professional photographer before he studied for the Ministry. And now Draper's old box-shaped camera is to be housed permanently in the Smithsonian Institution at Washington, after having rested for a full century in Hampton Sydney College in Virginia, where Dr. Draper's "fast action" portrait was made by Dr. Draper.

Too Much For Russia

Gorings' book "Making of a Nation," has been confiscated in Russia at the request of the Ministry of Culture, on account of a passage in which the field marshal declares that the great decision for Germany, Europe and the whole world would be the conflict between the Slavics and the Soviet State. "Should the latter win Germany would be destroyed by the blood terror of Communism and her destruction would be followed by that of Europe."

Cattle In Canada

The permanent establishment of cattle in Canada dates from about 1699 when Champlain brought a few head to the colony of Quebec. Cattle were placed in Acadia in 1622 and in 1671, according to the census of that year, had increased to 886.

Rubber Tires On Machinery

Weight And Air Pressure Are Important Factors

Experimental data secured from extensive tests with rubber tired equipment at the Dominion Experimental Station, Swift Current, Saskatchewan, states G. N. Denice, chief of the section, that the weight and air pressure are the two important factors in securing best results with rubber.

It has been definitely proven that the greater the weight the lower the slipage on traction wheels at any given pressure. The use of non-freezing liquid ballast in traction tires increases their draft ability in direct proportion to the weight used. This type of ballast or wheel weight is more effective than attached weights because of the reduction of bounce over rough ground and the fact that all pressure is exerted where the tire can best use it.

By increasing the weight on traction tires, a higher effective air pressure may be used with better tire life and satisfactory load pulling ability. Premises of 12 and 15 pounds with weights are more satisfactory than 10 pounds air pressure without weights. The front tire should be kept inflated to 30 or 35 pounds for best steering results. The rear tire should be inflated to require light ballast except where extra weight is necessary to the special design.

Impure tires should always carry the full air pressure recommended by the implement and tire manufacturer. The use of ballast in implement tires increases the power required to pull them and greatly reduces tire life. Keep all rubber tires high and dry when not in use, remove the weight by blocking if possible, and store them in a dry and dark place over winter.

Holding Himself Ready

Brilliant Construction Engineer Waiting To Serve British Air Ministry

One of the most brilliant aircraft construction engineers in the world is out of a job. He is 40-year-old Trevor Westbrook, over whose resignation as general manager 7,000 employees of Vickers-Armstrongs factory at Weybridge, Surrey, threatened to strike.

"I can't really tell you yet what my future is to be," he said. "I have been offered half a dozen jobs comparable with the one I have just left, but as the Air Ministry say they have a good job in view for me I am naturally waiting—though I am not sure what it is."

His most handsome offer came from the United States. "Do you think you go?" he was asked. "Good heavens, no," was his reply. "You have to stay and do what you can. There's a war on."

During his 24 years with Vickers Mr. Westbrook constructed the Schneider trophy winners of 1929 and 1931.

At Southampton he turned out the first Spitfire. Then he was recalled to the Ministry of Defence and Wellington bombers into production.

He rebuilt Vickers plants at Southampton and at Weybridge and laid out a new works in the North of England.

At Brooklands he had the reputation of wasting no words but getting every ounce out of the men. He built a hairdressing salon for them and they had a haircut every day in his canteen.

He worked eighty or ninety hours a week and had a bed in his office.

Study Bird Life

Two American Students Go To Churchill On Research Work

To Ralph S. Palmer and Lawrence I. Grinnell, graduate ornithologists students from Cornell University, Churchill, Man., is something more than a grain plot on Hudson Bay. It is the junction of the Hudsonian and Arctic biomes and as such, is an excellent place for research on many kinds of nesting birds.

At Churchill, the two will study birds and mammals, will make a series of colored pictures, mounting and still, and will try to complete the life history of the Redpoll, a member of the sparrow family, about which little is known at present. They plan to spend about two months at their work, winning Free Passes.

Fishermen See Country

From Cape Flattery to Alaska, on Canada's Pacific coast, fishermen's crafts now proud units of the Royal Canadian Navy, ply in and out of fjords, nosing into nooks of the land, making line in line to all, bear all and to fall all only to the fish. There is a lesson in that for every citizen.

NEWFOUNDLAND'S FIRST UNIT WELCOMED IN ENGLAND

The first unit of Newfoundland troops to arrive in England is seen above being welcomed by Field Marshal Lord Milne. This is Newfoundland's second contribution to the defense of the Empire. A few months ago a number of sailors sailed for a British port to man trawlers and minesweepers on the East coast.

Longevity Of Politicians

Remarkable Record Of Canadian Cabinet Members And Premiers

The death of Hon. Bruno Nantel, the second last surviving member of the Borden cabinet which took office in 1911, draws attention to the remarkable record of longevity made by the members of that ministry. Of the seventeen who have passed on, four lived to be over eighty, including Mr. Nantel now dead at 84. Four others lived to be over 75, at 81, 80, 79 and 78.

That is the record of a single cabinet. Canada's premiers have also been blessed, as a rule, with very long lives. Of the three who survive, Messrs. King and Meighen are still in their middle sixties, but Mr. Bennett will be 70 in July. Of the eight who have passed on, only one has failed to reach that age, Sir John Thompson who died suddenly in England at 50. Sir Charles Tupper lived to be 94; Sir Mackenzie Bowell, nearly 94; Sir Robert Borden, 82; Sir Wilfrid Laurier, 77; Sir John A. Macdonald, 76; Sir J. J. Abbott, 72; Hon. Alexander Mackenzie, 70.

Some of these men appeared to be physically frail. Sir Robert Borden was subject to attacks of illness throughout his parliamentary career, yet he lived through the trying ordeal of a war premiership to the age of 82. Political life does seem to be conducive to longevity. — Toronto Star.

New Cadets At R.M.C.

The Department of National Defence announced recently that one hundred new cadets would be admitted to the Royal Military College, September next. The academic year will be increased to last from September until the last week in July. Duration of courses is two years. The military standard will be maintained as before, while the emphasis is placed on the scientific and engineering education of the cadets. Cadets must be between the ages of sixteen and nineteen years.

Love the little trade that thou hast learned and be content with it.

The British Spittler, carrying eight guns, fired 120 rounds a second.

Appeal For Faith

Attempts To Dominate Nations By Evils And Vices For Allies

An appeal for calm and more faith in the omnipotence of God in the face of present world turmoil, featured the gathering of thousands of Christian Scientists from all over the world for the annual meeting of The First Church of Christ, Scientist, in Boston, Massachusetts.

"Trusting in the omnipotence of God," said Harry C. Browne, First Reader of The Mother Church, in reading a message from The Christian Science Board of Directors, "enables one to throw out of one's mind the freedom of thought resulting from the unfolding of the characteristics of divine Mind as expressed by Christ Jesus."

George Shaw Cook, the retiring president, pointed out that "the effort of one individual or nation to dominate others, or to exploit them, by means of force, coercion, dishonesty, and deception, may appear temporarily to succeed, but it cannot permanently prosper for the simple reason that evil has no divine principle. Its nature is self-destructive. The ultimate triumph of good is not merely a question of hope or even of faith. All that is good in human experience is upheld by divine or spiritual law. And this law is able to assert itself and enforce itself, in spite of the effort of misguided mortals to interfere with or to prevent its operation."

Would Fight Again

After fighting in four wars and collecting enough medals to make the left side of his tunic sag, the weight, 67-year-old F. W. W. Knights, of Vancouver, wants to get back into the fight again. He's in uniform now—the dark blue of the Corps of Commissioners—but he'd prefer khaki.

In business districts of representative American cities, legal car parking space has shrunk from one-third to one-half in the past 10 years.

An early type of machine gun used in the U.S. Civil War consisted of a number of 50-caliber musket barrels mounted in a cylindrical casing.

NO MORE TOOTHACHE FOR JACK CAULOCK

In the last war many Canadians on the battlefield were on the casualty list because of "toothache." This unit it will be a different story because the Dental Corps will keep the boys fit. A dentist with portable equipment is able to reach the soldier as much as the soldier can reach the dentist. Lieut. W. C. McCutcheon, in charge of the portable clinic above, goes to work on the ailing molar of a soldier, while his assistants mix the filler and repair another soldier's artificial molars.

Without Human Feeling

Chicago Newspaper Man Sees Another Example Of Nazi Cruelty

Germany has torn up the book of rules on the conduct of war, although she frequently charges that the Allies are not living up to these rules which mean nothing to her. The news from Holland, Belgium and France shows that the German airplane spars nobody and nothing. They bomb and machine-gun refugee men, women and children crowded together on roads, just as relentlessly as if each one of them was a soldier in arms.

A terrible example of Nazi cruelty, sheer sadism, is cited by Edgar Ansell Mowrer of the Chicago Daily News, who is with the French Army in France. Mr. Mowrer states that 22 boys about 12 years of age, were playing soccer football on a field above the village of Trois Maisons, near the "hospital city" of Phaisbroux, a place with no soldiers which has been signaled to the International Red Cross as a town of mercy.

Suddenly, over the trees, came the roar of German bombers. The children scattered like quail and threw themselves on their faces. But not one of the German planes shot at them. The children scattered like quail and threw themselves on their faces. But not one of the German planes shot at them.

Once its victims were emptied the Curtiss soared and rejoined the squadron returning to Germany. Its motor roaring with laughter. White and shimmering, the ladies arose—all but two. One of the German planes shot at them. The children scattered like quail and threw themselves on their faces. But not one of the German planes shot at them.

"This 'total war' as waged by Germans, men without human feeling; without pity. That is the kind of war that the Allies must win. He must win quickly if he is to win at all. One hates to say it, but it may be essential for the Allies to let the German use up his munitions. If people must have nothing left but eyes to weep with, so must it be—St. Thomas Times-Journal.

Home Opened In London

Purchased And Equipped By Englishman For Four Millions

Good wishes from Mr. Gandhi were sent at the opening of a settlement for poor Indians in Lambeth street, Signey, E. recently. Purchased and equipped at a cost of \$100,000 by Mr. Thomas Tuffen, recently down from Cambridge University, the settlement was opened by Lord Snel, who said: "The relationship between this country and India is not that existing between the Polish people and the Germans. It is a co-partnership in the development of a great people."

An experimental highway recently built was painted a dull orange color. It is said to have reduced road glare about 40 per cent.

India with its 230,000,000 Hindus has a minority of 80,000,000 Moslems.

The moon has neither air nor water, and its day is 14 times the length of a day on the earth.

Tanks Are Vulnerable

French Have Found A Way To Reach Their Vitals

The French have found a way to handle huge 70-ton German tanks. The juggernauts are said to be vulnerable on top because the Nazis haven't reinforced them with thick plates fore and aft.

The answer, say military sources, is Allied command planes. These Allied aircraft, which shoot shells, are said to be able to swoop down and send projectiles crashing through the big tanks. The shells explode inside and that takes care of the tank.

The Last Row

The Colonel over the telephone ordered that one of the unit cars should be sent round to him at once. "Story, sir," replied the commissioned officer, "The Major is out in the Vauxhall, the Adjutant has the Buick, the Medical Officer the Austin, and the Quartermaster has borrowed your bicycle."

The air changed from fair to warm, and when the Colonel recovered his breath, he shouted, "Find my batman, and if he's not wearing my boots, I'll walk!"

Feeling Uncomfortable

The Americans are beginning to feel very uncomfortable. They have realized, says the Toronto Saturday Night, that modern war is a new kind of game and there's nothing to stop it from extending right up into the bleachers.

"When the Queen of Sheba came and laid jewels and fine raiment before Solomon, what did he say?" asked the school teacher. "How much do you want for the lot?" suggested a boy.

Flush, seamless surfaces cannot be obtained with ordinary wallboards; your choice of decorative treatment is limited; panel stripping or other decoration revealing the joints is necessary. GYPROC allows you the choice of panelled walls if desired, or smooth, seamless walls with all joints rendered invisible. So with GYPROC your rooms are decorated to suit your individual taste.

And—in addition—you get all these outstanding GYPROC features:

- FIREPROOF—therefore safe
- PERMANENT AND DURABLE—therefore economical
- WILL NOT CRACK, WARP, SHRINK OR SWELL
- SMOOTH, DUST-FREE SURFACES—so easy to keep clean
- THE LIGHTEST WEIGHT gypsum wallboard made in Canada
- Takes ANY TYPE OF DECORATION

Gyproc is sold everywhere in Canada. See your local Dealer in Lumber and Builders' Supplies.

CHAPTER VI.—Continued

"A Prison-Gate Arrest
"What do you want?" asked Ingle again.

"Me? Nothing. I've been up to the prison making a few inquiries about a friend of one of those mocking birds, but you know what they are—it is love's labor lost, so to speak," said Elk, lighting a cigar and offering the case to his companion.

Ingle took the brown cylinder, melted it, and biting off the end savagely, accepted the light which the detective held for him. By this time the train was moving and they were free from any possibility of interruption.

"Let me see; I heard something about your other day . . . What was it?" Mr. Elk held his forehead in a picture of perplexity. "I've got it," he said. "There was a burglary at your flat."

"The cigar dropped from the man's hand."

"A burglary?" he said shrilly. "What was stolen?"

"Somebody opened the safe in your locker room—"

Ingle sprang to his feet, his teeth bared, his eyes glaring.

"The safe?" He almost screamed the words. "Opened the safe—damn them! They're not satisfied with sending me to five years of this hell, but they want to catch me again, do they?"

Elk let him rave on until, in his rage, the man's voice sank to a hoarse rattle of sound.

"I hope you didn't lose any money?"

"I thought it was something worth while," said Elk, annoyed. "Billy die, though, isn't it, Ingle?"

"To you, yes. To me, no," snapped the other. "I hate England! I hate the English! I hate all the middle-class people, the smirking, self-satisfied wretches! I hated them when I was a starving artist and they sat in their stalls with a sneer on their faces."

"There's a lot to be said for folk," mused Elk. "Now take Harlow—though you wouldn't call him a fat man."

"Harlow!" scoffed the other. "An other of your moneyed gods?"

"Yes," said Elk. "He's got something, for he stopped suddenly."

"I don't know." The man shook his head. "He may not be what he seems. In there," he jerked his head backward—"they say he's crook to his back teeth! But he doesn't rob the poor. He takes it in large slices from the fat men."

"If that so, I've nothing to say. He's on the side of law and order," said Elk again. "A man who hands out police stations as Christmas presents can't be wholly bad."

By the time the train pulled into Plymouth Station, Detective Inspector Elk was perfectly satisfied that there was nothing further to be learnt from the man who had been the telegraph office and sent a wire to Jim which was short and expressive:

Revolution stuff. Nothing important.

He was on the same train that carried Mr. Ingle to London, but he did not occupy the same compartment, except for half an hour after the train flashed through Bath, when he strolled into the carriage and sat by the man's side, as was apparently he was welcome, for Ingle started talking.

To Her Fate

"Have you seen anything of my nieces?" Does she about the burglary? "I think you told me, but I was so angry that I can't remember." And, when Elk had given him the fullest particulars, "Harlow! Why did he come? He met Allen at Dartmouth, you say?" He frowned and suddenly slapped his knee. "I remember the fellow. He was sprawling in his car by the side of the road when we came back from the field that day. So that was Harlow. Does he know Allen?" he asked anxiously.

"They met at Dartmouth; that's all I know."

Ingle gave one of his characteristic shrugs.

"I suppose he's running after her? She's a pretty sort of girl. With that type of man, money's no object. She's old enough to look after herself without any assistance."

"So this Utopian left Allen River to her fate."

He had walked from Plymouth asking her to call at the flat that night, and she arrived just as he had finished a dinner that he had cooked for himself.

"Yes, I've heard about the burglary," said Elk, cutting short her question. "They've got nothing that was worth a shilling to them, thank God! Why did you call in the police?"

"And he had a shock."

"Whom else should I have called in—a doctor?" she asked.

"It was the first time he had met her in a period of freedom. She had her instructions to look after the flat, run the house, and take care of a discharged convict, and their talks during the brief visiting hours had been mainly on business."

"What does one usually do when a burglary is discovered?" she asked. "I sent for the police—or called a man."

He stared at her fiercely, but she did not flinch. It was his eyes which dropped first.

"I suggest it's all right," he said, and then: "You know Harlow, don't you?"

"I met him at Dartmouth, yes."

"No more than you are," she said, and he had his second shock.

"I'm not going to quarrel with you, and I don't see why you should want to get fresh with me," he snapped. "You've been quiet, but I've not been ungenerous. Harlow is a friend of yours."

"He called here on the night of the burglary to offer me a job," she replied, without any visible evidence of her rising anger. "I met him at the flat, run the house, and take care of a discharged convict, and their talks during the brief visiting hours had been mainly on business."

"What does one usually do when a burglary is discovered?" she asked. "I sent for the police—or called a man."

"I suggest it's all right," he said, and then: "You know Harlow, don't you?"

"I met him at Dartmouth, yes."

"No more than you are," she said, and he had his second shock.

"I'm not going to quarrel with you, and I don't see why you should want to get fresh with me," he snapped. "You've been quiet, but I've not been ungenerous. Harlow is a friend of yours."

"He called here on the night of the burglary to offer me a job," she replied, without any visible evidence of her rising anger. "I met him at the flat, run the house, and take care of a discharged convict, and their talks during the brief visiting hours had been mainly on business."

"I suggest it's all right," he said, and then: "You know Harlow, don't you?"

"I met him at Dartmouth, yes."

"No more than you are," she said, and he had his second shock.

"I'm not going to quarrel with you, and I don't see why you should want to get fresh with me," he snapped. "You've been quiet, but I've not been ungenerous. Harlow is a friend of yours."

Christie's Graham-Wafers

largeness of his political views, was exceedingly mean.

There was a great deal for him to do: old boxes to open and sort, papers and memoranda to retrieve from strange hiding places. The seat of the big settee on which Allen had sat so often waiting for the hired women to finish their work, opened like a lid, and here he discovered, and, in a steel box, passbooks that might not have come to light even if the police had been aware of the flat at the time of his arrest and had made their usual search.

(To Be Continued)

Merchandise Is Fined

British Travelling Salesmen Make Use of Movies To Sell Goods

Colour films of the goods they are offering for sale may soon be part of the equipment of the commercial travellers during their salesmanship tours throughout the world.

The British Film Institute has put forward the scheme, to Sir Cecil Weir, head of the new Export Council established by the Board of Trade to increase Britain's wartime exports.

The majority of the export groups into which British industries have been divided for the purpose of the export drive have been approached and most of them have expressed their keenness.

"The films would be in miniature size and made in colour," said a representative of the Institute.

"A trailer can put several results into a suit case, and can hire a projector for a small sum in almost any part of the world. It can then show the films in his customer's own office, and by supplying a running commentary can give the customer a better idea of the product and its qualities than any amount of talk would do."

"These 'samples in celluloid,' provide, in a few minutes, a visual appeal which could not possibly be achieved by 'stills' in illustrated catalogues. Films would cost £200 or less according to length and quality. An additional advantage would be that the customer could see the product in various stages of manufacture, and British work-people at work on the home front."

Empire Press Union

Loyalty Of The Press Of The British Empire Is Stressed

The solidarity and loyalty of the press of the British Empire were expressed in a resolution passed at the annual conference of the Canadian section of the Empire Press Union held in Toronto recently with Lord Col. J. H. Woods of Calgary presiding. Copies will go to the London headquarters and to all sections of the Union throughout the Empire.

Regret that the outbreak of the war had forced the postponement of the sixth Imperial Press Conference for the holding of which in Canada this year elaborate plans were well advanced, was coupled with confident anticipation that victory for the allies would permit the original program to be carried out in due time.

W. Rupert Davies, Kingston, Ont., presided on the proceedings of the meeting of the council held in London last June, which he and Horace R. Hunter of Toronto attended as delegates of the Canadian section.

House were built at the rate of 1,000 a day in England and Wales just before the war.

In Australia, poisonous species of snakes far outnumber harmless kinds.

Drive out ACNES

WATER MINERAL

When modern man gains weight, he has only to loosen his belt or have his suit cut. Knights of old had a real problem in keeping their waists from growing in proportion to their bodies.

To remove shells easily from hard-boiled eggs, plunge the eggs as soon as they are cooked into cold water.

A Military Hero

General Weygand Has Tackled Biggest Job In The World

The need of the Allies at the moment seems to be great. General Weygand was called to take charge of the Allies' campaign on land. Gamelin was not measuring up to the task, although he would not have been better.

Weygand is now 73 years of age, and joined the army in 1887. He was all through the last war. For a time in the winter of 1917-18 he was France's representative on the Versailles war council, but Foch sent him in March of 1918. It is recorded that his work in the critical battles of March to October was "exceedingly brilliant, but owing to its nature brought him less recognition than was deserved."

There is something in claim that he was actually the thinker for Foch is unknown.

General Weygand is considered an attacker rather than a defender in given positions. If there is one man in France who came through the war with reputation it is he. The French mind turns readily to the military hero and it is the standing of Weygand in his own land, his mental and physical ability are those of a younger man. He thinks and plans and acts in high gear.

He knew every move made in the world, and knows too whether it was good, bad or indifferent. At 73 he is lacking the biggest job in the world. —Petersburg Examiner

New Technique In Surgery

Method Is Expected To Simplify Joining Of Arteries

Development of a method of blood vessel surgery in which sugar rods are used as "darning eggs" in rejoining the delicate tissues was announced at the University of Chicago.

The announcement accompanied the award of the Harry Ginn Smith memorial prize to Sidney Smith, Jr., a university medical student who developed the method which scientists believe promises to simplify an extremely difficult operation.

Still in its experimental stage, the method provides a means of suturing blood vessels so soundly that university scientists said any competent surgeon could use it.

Dr. Smith devised a device, a corn-cob, she places a "darning egg" behind the hole to hold the fabric taut or stretch. With Smith's surgical technique, the two ends of the artery are threaded on to a slender rod of sugar coated with a thin film of oil to support the tissues.

The ends together, the two ends can be sewn with "over and over" stitches. Different size rods are prepared for different size arteries.

When the clamps have been removed and the blood flow resumes, the sugar rod dissolves in 10 to 15 seconds and the circulation proceeds normally.

More Cruelly

Nazis Charged With Taking Blood From Polish Children

The Paris office of the Polish Information Service, a department of the exiled Polish government, said "the Germans are taking blood from children in occupied Poland for transfusion to German wounded soldiers."

It is added that since the beginning of May the drawing of blood occurred in "rapid and brutal" operation which "many under-nourished children have not survived."

Much Easier Now

When modern man gains weight, he has only to loosen his belt or have his suit cut. Knights of old had a real problem in keeping their waists from growing in proportion to their bodies.

To remove shells easily from hard-boiled eggs, plunge the eggs as soon as they are cooked into cold water.

Incendiary Powder

Australian Technical Chemist Makes Discovery Of Destructive Element

Dr. J. R. Atcherley, a Melbourne technical chemist, has discovered an incendiary powder which he claims is cheaper to make and more destructive than a similar preparation reported to be in use by the German Air force.

The powder, he says, is fired by oxidation on contact with the air, and by slightly varying its composition the time lag before ignition can be controlled.

The powder can be dropped from planes in light containers or even in canvas satchels, which burst on hitting the ground. Its destructive force can be increased by releasing it in the clouds, thus spreading it over a wider area. The interval between release and ignition can be varied from five seconds to five hours, so that "planes can be well clear of the area attacked before the powder is ignited."

The powder will burn under water. One of the more expensive components of the German equivalent is phosphorus, and unless the German powder, rather than phosphorus, is needed to fire it. The Royal Australian Air Force is at present testing the invention under service conditions. —Australian Press Bureau

WORLD WIDE OBJECTIVES

IN ALLIED WAR AIMS

British statements have been reported,
by correspondents in the British
"commonwealth" overseas, for emphasizing
the European aspect of Allied war
aims.The report is fair. It is not merely
to alter the map of Europe that Great
Britain and her Allies of the Empire
are resolved to win the war against
Nazi Germany at whatever cost. Their
enemies and their objectives are world-
wide.Yet, although over-emphasis of the
need for building a new order, specifi-
cally in Europe is to be regretted, it is
wholly natural. The foe whom we
fight is European power. The occasion
of the war was an act of flagrant ag-
gression in Europe. In Europe, as this
is being written, lie the theatre of
active land warfare.Again, when we come to express our
war aims in concrete terms, we must
not begin with the liberation of Euro-
pean states enslaved to Nazi Ger-
many—Czechoslovakia, Poland, Nor-
way, Denmark. At this stage, it is
better to express other war aims with
half such sharp definition.The defeat of Nazi Germany in
Europe, moreover, is the condition
precedent of achieving our war aims
in the wider world. Until the night-
mare of attack by Hitler and his
hordes has been removed from the
consciousness of Europe (including
Great Britain and Ireland), there
will be neither the cash nor the oppor-
tunity for the hard effort that we
burn to make towards world-wide eco-
nomic and political progress.The world order exists in European
order. Nor should the extra-European
peoples, fighting side by side with
Great Britain and France, be surprised
that this is so, or complain that
war aims in Europe are more pre-
sented of than war aims in their
own continents and oceans.Does North America, does Austr-
Asia, or the north of Africa and Asia
where, west of Britain and French
imperial power runs, live in constant
fear of aggression by a neighbour arm-
ed to the teeth, followed by subtile
and ordered progress have already been
secured.What Indiana would exchange the
position of their country for that of, say
Rumania today, completely independ-
ent sovereign state though she be? It
is not the mere foundation of the
British Commonwealth, and of France-
Beyond-the-Sea, are chiefly fighting
for is not the mere foundation of the
good life as nations and citizen-
states of the world, but the chance to
go on building the super-structure.
The British Commonwealth is fight-
ing for the chance to work out its own
destiny, as a community of nations
rising severally and jointly to greater
economic welfare and political stature.
The new world order, which we hope
to fertilize with the ashes of the old
order in Europe can be expressed in
these very terms.

To turn the jungle of sovereign

states into a garden of nations

is the aim of the Allied war.

To turn the jungle of sovereign

states into a garden of nations

is the aim of the Allied war.

To turn the jungle of sovereign

states into a garden of nations

is the aim of the Allied war.

Snicklefritz----

What would you think if I were to
steal just one little kid?"What would you think of a burglar
who had a chance to steal a hundred
dollars, and only took a penny?""Will you buy one of these little
albums? I'm selling them for the Red
Cross.""Sure I will!" said the farmer. "How
much shall I give you?""It's for the Red Cross, you know.
Give till it hurts."

"All right, cutie, here's a dime."

"Mister, you sure do bruise easily."

Little Sister: "Bobbie, quick—I've
tripped my tart under the table. See!
That Rover doesn't eat it!"Bobby: "Don't worry—I have my
foot on it!"Foreman—Wot's up, Bill 'ut yer-
self!

Bill—No, gotta nail in my boot.

Foreman—Why dencher take it out?

Bill—Wot! In me dinner-hour

And now, dear, that we are married,
let us have a clear understanding about
our affairs, said the practical young
man to his bride. Do you wish to be
president or vice president?Neither, the girl replied. I'll just be
the treasurer.Private Pat Flynn was in a forward
post when a German raid had just
been driven back.The sergeant in charge had noticed
that Pat hadn't fired a round and ticked
him about it."Sun! Pat said, "O! gets me right
trained on one, an' then after I get
time to put the trigger another of 'em
spawns gets in the road and spits me
aim!"Hitler, Mussolini and Stalin were
discussing their conquest of the world.
Said Stalin: "After we conquer the
world we'll make Moscow the capital
of the world.""No, no," said Mussolini. "Rome is
the right choice for our capital. Why
the Lord Himself called Rome the
Holy City?"Hitler wheeled about. "When did I
say that?" he demanded.

ITALY'S FOOD SHORT AND
ALL PRICES ARE SOARINGPrices continue to rise sharply in
Italy. From one end of the peninsula
to the other correspondents complain
of the failure of crops, in part because
of the intense cold of last winter; in
part because of drought. In the north
especially, many farmers state that
they will plant only enough grain for
next year's seed since grain is now so
scarce. A correspondent declares that
fodder is scarce and cattle diseased.
"The crops are ruined," he writes,
"burned dry. We have not been able
to make bread for eight days now as
we could not find flour."Among Italian peasants, bread is an
essential part of every meal.Scarcity is reported to be greater
than in the war 1914-18. Soap is a
scarce at one end a week. Corn is
as dear in some districts that building
is stopped. In other districts, all build-
ing materials have been requisitioned
for fortifications.states into a community of nations;
to seek for each and all of them greater
economic welfare; and to establish
the conditions in which each can use
to its full political stature and make
its full contribution to world progress
—these are the wider war aims of the
Allies in every continent.
